Work order 293A has been established to cover necessary repairs to refinery stills 13, 14 and 15 which were damaged in a fire that occurred at about 9 A.M. Aug. 18, 1967. The fire was occasioned by vapor release, which became ignited and which was controlled by plant personnel with a dry chemical fire extinguisher. The fire department was not called.

The damage essentially was to insulation. It is estimated that the loss of insulation and thermocouple wire would be about \$200.00 and that the overall final cost, including the installation of stainless welds on the thermocouples will not exceed \$500.00

Kindly make all charges to General Ledger Account 133-293 A.

Very truly yours,

T. E. Reilly
